PUBLICATION HISTORY

REV A.1
FEB 16, 2023

Introduction

This ordering guide covers the ordering information for the below servers:

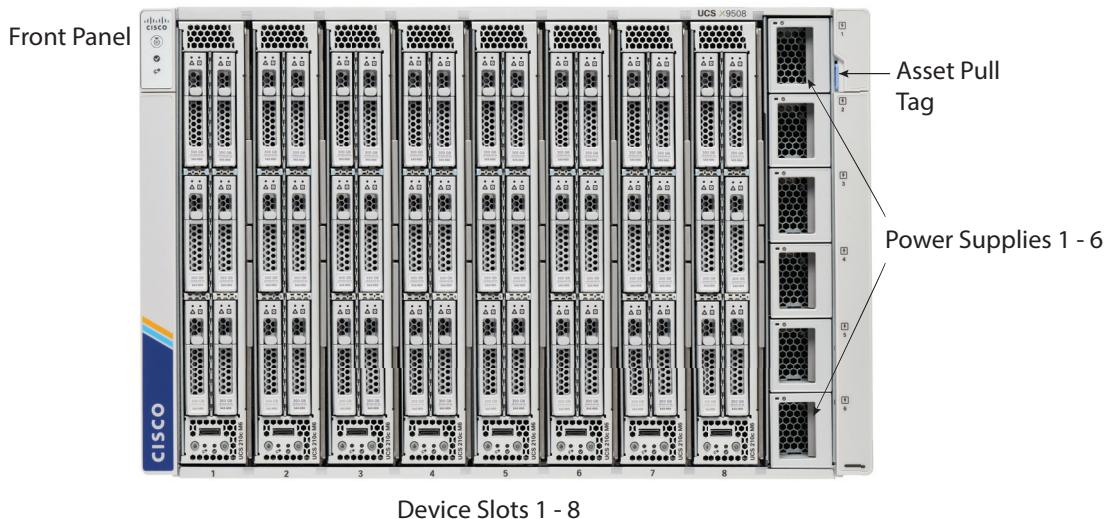

The Cisco UCS X9508 chassis:

The Cisco UCS® X-Series Modular System begins with the Cisco UCS X9508 chassis, engineered to be adaptable and future ready. It is a standard, open system designed to deploy and automate faster in concert with your hybrid cloud environment.

With a midplane-free design, I/O connectivity for the X9508 chassis is accomplished with front-loading, vertically oriented compute nodes intersecting with horizontally oriented I/O connectivity modules in the rear of the chassis. A Unified Ethernet fabric is supplied with the Cisco UCS 9108 Intelligent Fabric Modules. Cisco UCS X-Fabric Technology interconnects enable connectivity between the compute and resource nodes using PCIe Gen4 and will supply other industry-standard protocols as standards emerge. Interconnections can be easily updated with new modules.

The 7 rack-unit (7RU) Cisco UCS X9508 chassis has 8 flexible slots that can house a combination of compute nodes and a pool of current and future I/O resources that may include GPU accelerators, disk storage, and nonvolatile memory.

Figure 1 Cisco UCS X9508 Chassis Front View (populated)

Cisco UCS X210c M7 Compute Node:

The Cisco UCS X210c M7 Compute Node is the second generation of compute node to integrate into the Cisco UCS X-Series Modular System. It delivers performance, flexibility, and optimization for deployments in data centers, in the cloud, and at remote sites. This enterprise-class server offers market-leading performance, versatility, and density without compromise for workloads. Up to eight compute nodes can reside in the 7-rack-unit (7RU) Cisco UCS X9508 Server Chassis, offering one of the highest densities of compute, I/O, and storage per rack unit in the industry.

Figure 2 Below Images shows the front view of the UCS X210c M7 Compute Node

UCS X440p Gen4 PCIe Node:

The Cisco UCS X440p Gen4 PCIe Node is a new node type that is now supported in the UCS X9508 chassis. This can be attached to UCS X210c compute node in the UCS X9508 chassis to provide GPU accelerators support using the UCS 9416 X-Fabric modules for UCS X9508 chassis.

The Cisco UCS X440p PCIe Node is the first PCIe resource node to integrate into the Cisco UCS X-Series Modular System. Up to four PCIe Nodes can reside in the 7-Rack-Unit (7RU) Cisco UCS X9508 Chassis and can be paired with one compute node each, offering up to four GPUs to a Cisco UCS X210c Compute Node with Cisco UCS X-Fabric Technology.

Figure 3 Front views of Cisco UCSX-440P PCIe Node

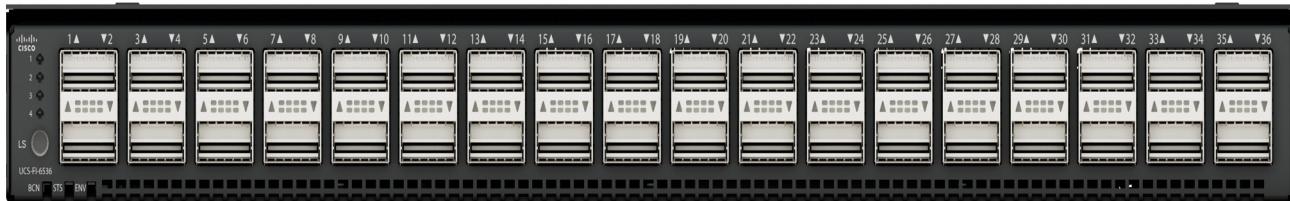

The Cisco UCS 6536 Fabric Interconnect (FI):

The Cisco UCS 6536 Fabric Interconnect (FI) is a core part of the Cisco Unified Computing System, providing both network connectivity and management capabilities for the system (Figure 2). The Cisco UCS 6536 Fabric Interconnect offer line-rate, low-latency, lossless 10/25/40/100 Gigabit Ethernet, Fibre Channel over Ethernet (FCoE), and Fibre Channel functions.

The Cisco UCS 6536 Fabric Interconnect provide the management and communication backbone for the Cisco UCS X-Series compute nodes, UCS X9508 X-series chassis, UCS B-Series Blade Servers, UCS 5108 B-Series Server Chassis, UCS Managed C-Series Rack Servers, and UCS S-Series Storage Servers. All servers attached to a Cisco UCS 6536 Fabric Interconnect become part of a single, highly available management domain. In addition, by supporting a unified fabric, Cisco UCS 6536 Fabric Interconnect provides both the LAN and SAN connectivity for all servers within its domain.

From a networking perspective, the Cisco UCS 6536 uses a cut-through architecture, supporting deterministic, low-latency, line-rate 10/25/40/100 Gigabit Ethernet ports, a switching capacity of 7.42 Tbps per FI and 14.84 Tbps per unified fabric domain, independent of packet size and enabled services. It enables 1600Gbps bandwidth per X9508 chassis per domain with a X9108-IFM-100G in addition to enabling end-to-end 100G ethernet and 200G aggregate bandwidth per X210c compute node. With X9108-IFM-25G and IOM 2408, it enables 400Gbps bandwidth per chassis per FI domain. The product family supports Cisco low-latency, lossless 10/25/40/100 Gigabit Ethernet unified network fabric capabilities, which increase the reliability, efficiency, and scalability of Ethernet networks. The fabric interconnect supports multiple traffic classes over a lossless Ethernet fabric from the server through the fabric interconnect. Significant TCO savings come from Cisco's unified fabric design in which Network Interface Cards (NICs), Host Bus Adapters (HBAs), cables, and switches can be consolidated.

Figure 4 Front views of Cisco UCS 6536 Fabric Interconnect

Purpose, Audience, and Scope

Purpose:

This document describes how to order the Cisco UCSX M7 Product.

Audience:

- ***Buy Method Through Cisco (Eg: Direct Customer & Tier 1 Partners):***
 - ***Scenario 1: Customer Without Enterprise Agreement for Cisco Intersight Software License***
 - ***Scenario 2: Customer With Enterprise Agreement for Cisco Intersight Software License***
- ***Buy Method Through Distributor (Eg: Tier 1 & Tier 2 Partners):***
 - ***Scenario 1: Customer Without Enterprise Agreement for Cisco Intersight Software License***
 - ***Scenario 2: Customer With Enterprise Agreement for Cisco Intersight Software License***

Scope:

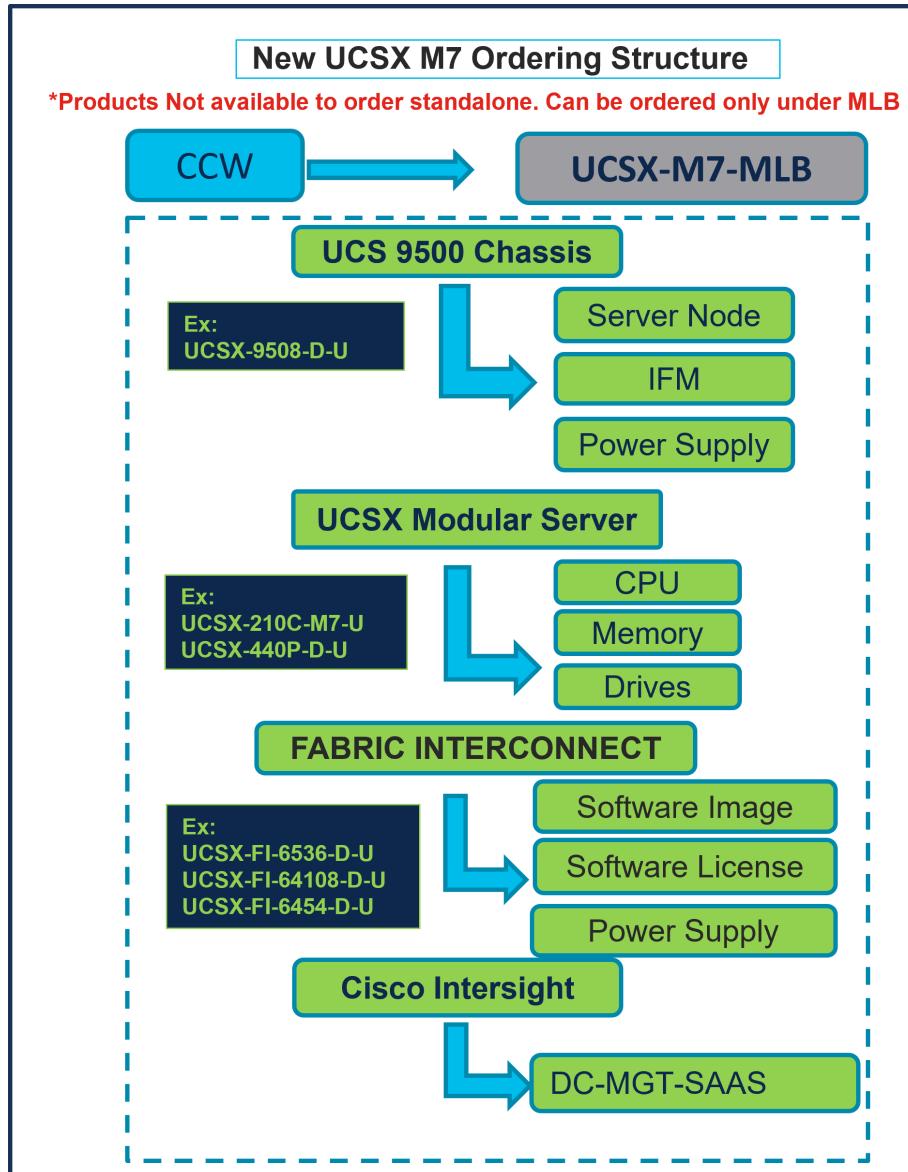

This document covers the following:

- ***CHAPTER 1 UCSX M7 ORDERING STRUCTURE***
- ***CHAPTER 2 CATALOG OF PRODUCT IDs (PIDs)***
- ***CHAPTER 3 HOW TO CONFIGURE THE UCSX M7 SERVER***
- ***CHAPTER 4 PREREQUISITE INFORMATION REQUIRED TO QUOTE AND ORDER***

CHAPTER 1 UCSX M7 ORDERING STRUCTURE

- UCSX M7 Ordering Structure. ([Figure 5](#))

Figure 5 UCSX M7 Ordering Structure

CHAPTER 2 CATALOG OF PRODUCT IDs (PIDs)

Table 1 Top Level Major Line Bundle ordering PIDs

Product ID (PID)	Description
UCSX-M7-MLB	UCSX M7 Modular Server and Chassis MLB

Table 2 Hardware Major Line PIDs¹

Product ID (PID)	Description
UCSX-9508-D-U	UCS 9508 Chassis Configured
UCSX-210C-M7-U	UCS X210c M7 Compute Node 2S w/o CPU, Mem, Drv, Mezz
UCSX-440P-D-U	UCS X-Series Gen4 PCIe node
UCSX-FI-6536-D-U	Fabric Interconnect 6536 for IMM
UCSX-FI-6454-D-U	UCS Fabric Interconnect 6454
UCSX-FI-64108-D-U	UCS Fabric Interconnect 64108

Notes

1. This product may not be purchased outside of the approved bundles. Please use MLB: UCSX-M7-MLB

CHAPTER 3 HOW TO CONFIGURE THE UCSX M7 SERVER

Audience:

Buy Method Through Cisco (Eg: Direct Customer & Tier 1 Partners)

- *Scenario 1: Customer Without Enterprise Agreement for Cisco Intersight Software License*
- *Scenario 2: Customer With Enterprise Agreement for Cisco Intersight Software License*

Scenario 1: Customer Without Enterprise Agreement for Cisco Intersight Software License

Follow the below steps to configure the UCSX M7 Server.

(Step 1) :

- a. In CCW search for **UCSX-M7-MLB** PID and click on **Add**
- b. Click on **Select Options** to enter the configurator.

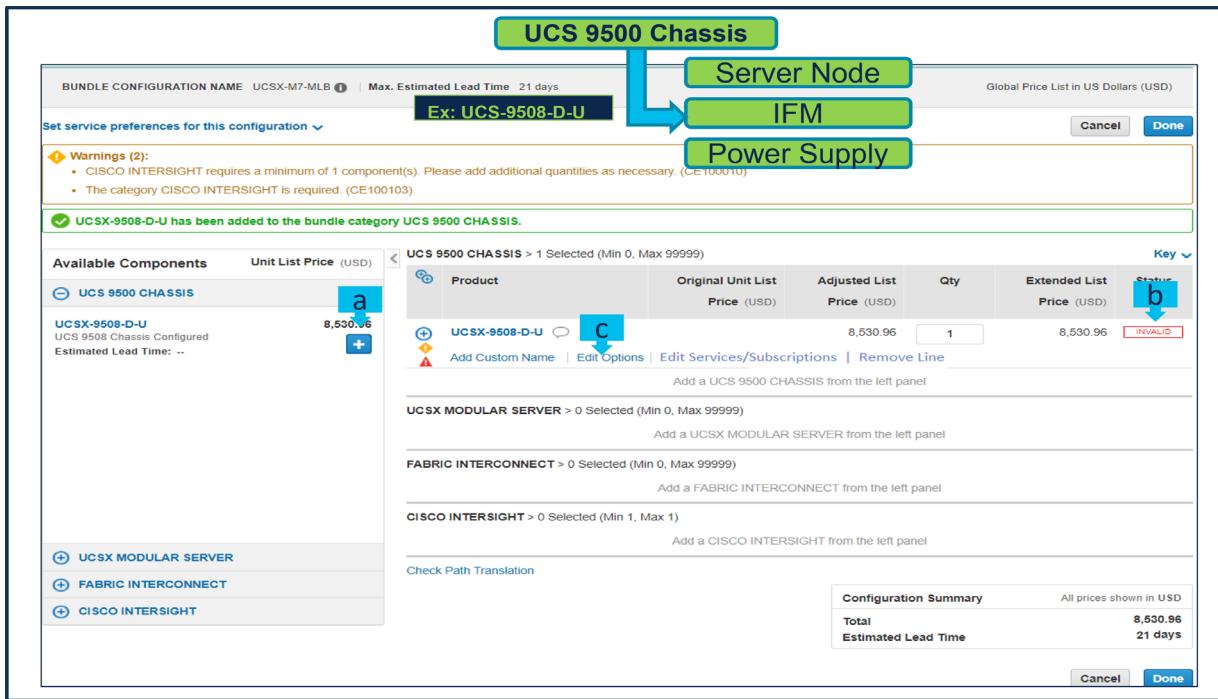

The screenshot shows the Cisco CCW interface. At the top, there is a search bar with the text "Search by Sku, Program ID, Description and Product Family" and a dropdown menu set to "1". To the right of the search bar is a blue "Add" button with a small arrow icon. Below the search bar, there is a message: "The product discounts are cascaded to subscription items, however subscription items may only be eligible for lower discounts. To apply the proper discount to subscription items, click on "MORE" and then, "Apply Discount"". Further down, there is a table with the following data:

	Hardware, Software and Services	Estimated Lead Time	Unit List Price (USD)	Qty	Unit Net Price (USD)	Discount (%)	Extended Net Price (USD)
<input type="checkbox"/>	1.0 UCSX-M7-MLB more »	Not Applicable	0.00	1	0.00	0.00	0.00

At the bottom of the screen, there are several buttons: "Remove Selected Lines", "Apply Success Track", "More", "Filter By", "All Items", and "Select Options". The "Select Options" button is highlighted with a red box and a blue arrow pointing to it from the bottom left. There is also a note: "Invalid as of 11-Feb-2023 11:51:37 PST".

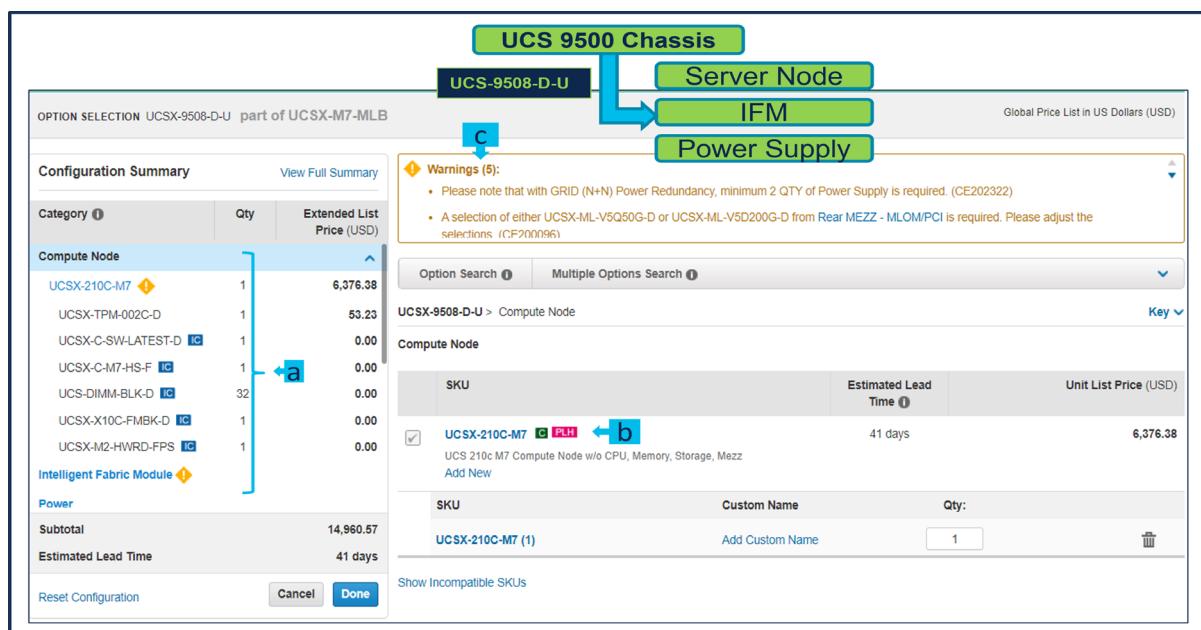

(Step 2) :

- Select UCSX-9508-D-U ATO from under **UCSX-M7-MLB** by clicking the **+**
- Notice the **UCSX-9508-D-U** ATO status is **invalid** as further configuration is needed.
- Click on **Edit Option** to enter the configurator.

(Step 3) :

- Configure **UCSX-9508-D-U** by selecting compute node and intelligent fabric module, power supply and power cables from category window on the left.
- UCSX-210C-M7** is required selection and has further configurable.
- Follow **warning** messages to configure the minimum required selections under chassis

(Step 4) :

- Configure **UCSX-210C-M7** by selecting processor, memory, drives and other peripheral devices and PIDs are listed in the window on the right.
- Follow **warning** messages to configure the minimum required selections under the server
- Click on **Done** when completed.

UCS X-Series Gen4 PCIe node

Clear Selection **Show Incompatible SKUs**

(Step 6) :

- a. Configure GPU PCIe node **UCSX-440P-D** by selecting riser, GPU and NVIDIA license on the right window
NOTE: Selection of X- Fabric Module: **UCSX-F-9416-D** under chassis: **UCSX-9508-D-U** is required with **UCSX-440P-D**.

The screenshot shows the 'OPTION SELECTION' screen for the UCSX-9508-D-U part of the UCSX-M7-MLB. At the top, there's a summary of selected components: UCSX-210C-M7 (Qty 1, \$6,376.38), UCSX-440P-D (Qty 1, \$3,316.50), and several other minor components like TPM, DIMM, and fabric modules. A callout arrow points from the 'Riser' and 'GPU' components in the title bar down to the configuration table. In the 'Warnings' section, it notes that UCSX-440P-D requires a minimum quantity of 2 from Riser (CE100012) and that with GRID (N+N) Power Redundancy, minimum 2 QTY of Power Supply is required (CE202322). On the right, a detailed view of the 'Riser' category shows two options: 'UCSX-RIS-A-440P-D PLH' (Qty 1, 21 days, \$596.37) and 'UCSX-RIS-B-440P-D PLH' (Qty 1, 21 days, \$706.72). Arrows labeled 'a' point to the 'Qty' fields for both riser options.

(Step 7) :

- a. Note status is now **valid**.
b. Increase the quantity for multiples of same configuration.
c. Click on **+** to add and configure the same product with different option/quantities or select a different product.

The screenshot shows the 'BUNDLE CONFIGURATION NAME' screen for UCSX-M7-MLB. It lists the 'Server Node', 'IFM', and 'Power Supply' components. A callout arrow points from the 'Power Supply' component in the title bar down to the configuration table. In the 'Available Components' section, 'UCSX-9508-D-U' is selected with a unit list price of \$8,530.96. An arrow labeled 'C' points to the '+' button next to the component name. In the configuration table, a row for 'UCSX-9508-D-U' shows a quantity of 2, an adjusted list price of \$39,941.59, and a total extended list price of \$101,431.86. A green 'VALID' status bar is shown next to the quantity field. Arrows labeled 'a' and 'b' point to the 'Qty' field and the 'VALID' status bar respectively. The configuration summary at the bottom indicates a total of \$101,431.86 and an estimated lead time of 41 days.

(Step 8) :

- a. Click on **Edit Service/Subscriptions** to edit term duration for HW support.

Note: It is recommended that term duration for HW support must align with software subscription duration.

Add a UCSX MODULAR SERVER from the left panel

FABRIC INTERCONNECT > 0 Selected (Min 0, Max 99999)

(Step 16) :

a. Configure GPU PCIe node **UCSX-440P-D-U** by selecting riser and GPUs.

b. Click on **Done**

NOTE:

■ Must select UCSX Modular Server: UCSX-210C-M7-U and QTY of UCSX-440P-D-U must be less than or equal to UCSX-210C-M7-U

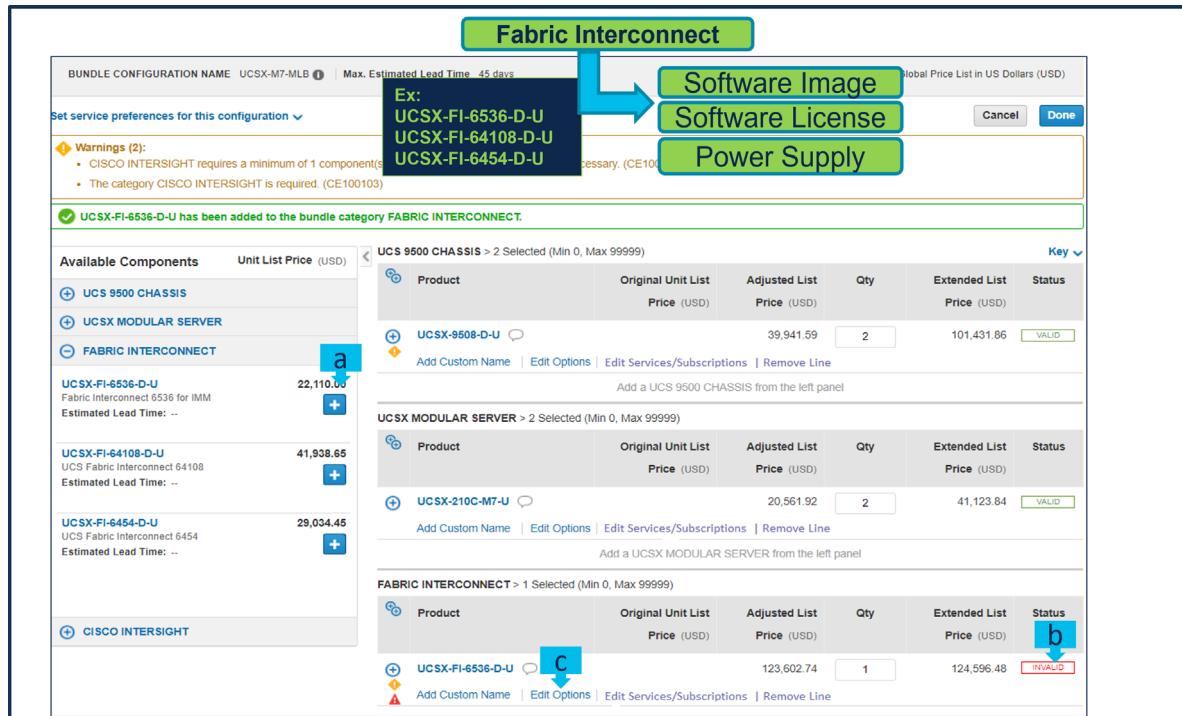

(Step 17) :

a. Select **UCSX-FI-6536-D-U** ATO from under MLB by clicking the **+**

b. Notice the **UCSX-FI-6536-D-U** ATO status is **invalid** as further configuration needed.

c. Click on 'Edit Option' to enter the configurator.

(Step 18) :

- Configure **UCSX-FI-6536-D-U** by selecting peripherals from category window on the left.
- PIDs are listed in the window on the right. some PIDs like software image, software license, power supply, power cable options located above SKU window on the right.
- Follow **warning** messages to configure the minimum required option PIDs.
- Click on **Done** when completed

Category	Qty	Extended List Price (USD)
Software Image	1	0.00
Software License	1	9052.29
Power Supply	2	1,987.48
Power Cable	2	124,596.48
Subtotal		124,596.48
Estimated Lead Time		21 days

SKU

SKU	Qty	Estimated Lead Time	Unit List Price (USD)
NO-POWER-CORD	2	3 days	0.00
CAB-C13-C14-3M-IN	2	28 days	0.00
CAB-C13-C14-2M	2	35 days	0.00
CAB-C13-C14-AC	2	7 days	0.00
CAB-C13-C14-IN	2	28 days	0.00

(Step 19) :

- Note Status is now **Valid**.
- Increase the quantity for multiples of same configuration.
- Click the **+** to add and configure the same product with different option/quantities or select a different product

Available Components	Unit List Price (USD)
UCS 9500 CHASSIS	22,110.00
UCSX MODULAR SERVER	41,938.65
FABRIC INTERCONNECT	29,034.45

Product	Original Unit List Price (USD)	Adjusted List Price (USD)	Qty	Extended List Price (USD)	Status
UCSX-9508-D-U	39,941.59	39,941.59	2	101,431.86	VALID

Product	Original Unit List Price (USD)	Adjusted List Price (USD)	Qty	Extended List Price (USD)	Status
UCSX-210C-M7-U	20,561.92	20,561.92	2	41,123.84	VALID

Product	Original Unit List Price (USD)	Adjusted List Price (USD)	Qty	Extended List Price (USD)	Status
UCSX-FI-6536-D-U	123,602.74	123,602.74	2	124,596.48	VALID

(Step 20) :

a. Click on **Edit Service/Subscriptions** to edit term duration for hw support.

Note: It is recommended that term duration for HW support must align with software subscription duration.

The screenshot shows the 'Fabric Interconnect' configuration page. At the top, it displays 'BUNDLE CONFIGURATION NAME: UCSX-M7-MLB' and 'Max. Estimated Lead Time: 45 days'. Below this, a blue arrow points from the 'Services/Subscriptions' tab to the 'Services/Subscriptions' section. The 'Services/Subscriptions' section contains three tables:

- UCS 9500 CHASSIS > 2 Selected (Min 0, Max 99999)**: Shows one item: 'UCSX-9508-D-U' with a quantity of 2 and a total price of 101,431.86 USD.
- UCSX MODULAR SERVER > 2 Selected (Min 0, Max 99999)**: Shows one item: 'UCSX-210C-M7-U' with a quantity of 2 and a total price of 41,123.84 USD.
- FABRIC INTERCONNECT > 1 Selected (Min 0, Max 99999)**: Shows one item: 'UCSX-FI-6536-D-U' with a quantity of 2 and a total price of 124,596.48 USD.

Each table has a 'Key' column at the top right. The bottom of each table has a note: 'Add a [component] from the left panel'.

(Step 21) :

a. Enter the term duration.

b. Click on **Apply and Done**.

The screenshot shows the 'Edit Services/Subscriptions' page for 'UCSX-FI-6536-D-U'. A blue arrow points from the 'Services/Subscriptions' tab to the 'Duration' input field. The 'Duration' field is set to '36'. Another blue arrow points from the 'Duration' field to the 'Apply' button. The page includes sections for 'Service Options' and 'Service SKU' mapping.

Service SKU	Product SKU	Unit List Price (USD)	Qty	Total List Price (USD)
SMART NET TOTAL CARE (1 ITEM)	C4P (SNTC 24X7X4OS) SUMMARY	7,875.00	1	7,875.00
CON-OSP-UCSXUFI	SNTC-24X7X4OS UCS Fabric Interconnect 6536 SERVICE SKU		1	
Change Service	Remove Service			

At the bottom right, there is a 'Configuration Summary' table and 'Cancel' and 'Done' buttons.

(Step 22) :

- It is recommended that term duration for HW support align with software subscription duration.
- Intersight is a required selection, if you have not previously purchased Cisco Intersight Software. Please make selection by clicking
- Click on **Edit Options** to configure.

The screenshot shows the Cisco Intersight configuration interface. At the top, there are two green boxes: "Cisco Intersight" and "DC-MGT-SAAS". Below them is a table of available components:

Available Components	Unit List Price (USD)
UCS 9500 CHASSIS	0.00
UCSX MODULAR SERVER	0.00
FABRIC INTERCONNECT	0.00
CISCO INTERSIGHT	0.00
DC-MGT-SAAS	0.00
CNDL-DE-SELECT-D Conditional Deselected Estimated Lead Time: --	0.00

Below the table, four sections show selected items:

- UC SX-9508-D-U**: Qty 2, Extended List Price 101,431.86, Status VALID. A blue arrow labeled 'b' points to the product row.
- UC SX-210C-M7-U**: Qty 2, Extended List Price 41,123.84, Status VALID. A blue arrow labeled 'b' points to the product row.
- UC SX-FI-6536-D-U**: Qty 1, Extended List Price 124,596.48, Status VALID. A blue arrow labeled 'b' points to the product row.
- DC-MGT-SAAS**: Qty 1, Extended List Price 0.00, Status INVALID. A red triangle warning icon is shown. A blue arrow labeled 'b' points to the product row. A blue arrow labeled 'a' points to the "Requested For" field.

(Step 23) :

- Requested Start Date (RSD)** is now dependent on HW Ship Date and will automatically start when the HW ships. If you change the **RSD**, the software will start either on the **RSD** you picked or the HW ship date whichever is later.
- End Date (duration in months)** is defaulted to 36 months, **Auto Renewal (on/off)** is defaulted to on and **Billing Frequency** is defaulted to Prepaid Term. You can still change the setting accordingly.

The screenshot shows the "Purchase DC-MGT-SAAS Configuration" interface. At the top, there are two green boxes: "Cisco Intersight" and "DC-MGT-SAAS". Below them is a table of current requested terms and billing:

Requested Start Date	Requested For	Automatically Renews For	Billing Frequency
12-Feb-2023	36 Months From 12-Feb-2023 To 11-Feb-2026	12 Months On 12-Feb-2026	Prepaid Term

A note below the table states: "Cisco will apply a standard lead time to your requested start date based on the selected product. Cisco may not be able to honor the requested start date (RSD). In some cases, our systems may require additional lead-time to provision your services. Submitting a RSD that is too early could cause customer subscription billing issues. Verify the requested start date with your implementation team that aligns with customer deployment readiness. (C0742)"

Below the table, there are two main sections:

- REQUESTED FOR**: Shows "36 Months" from "12-Feb-2023" to "11-Feb-2026". A red arrow labeled 'a' points to the "From" date field. A red arrow labeled 'b' points to the "Effective For" field.
- Automatically Renews For**: Shows "12 Months On 12-Feb-2026". A red arrow labeled 'b' points to the "On" date field.

On the right side, there are two sections:

- End Date**: Shows "Effective For 36 Months". A red arrow labeled 'b' points to the "Effective For" field.
- Billing Frequency**: Shows "Prepaid Term". A red arrow labeled 'b' points to the "Prepaid Term" radio button. Other options include "Annual Billing", "Quarterly Billing", and "Monthly Billing".

At the bottom right are "Cancel" and "Save Changes" buttons.

(Step 24) :

- a. The quantity of Cisco Intersight 2.0 Infrastructure Services License under Offer: **DC-MGT-SAAS** should be equal to the quantity of server selected. enter the quantity.

(Step 8) :

a. Click on **Edit Service/Subscriptions** to edit term duration for HW support.

Note: It is recommended that term duration for HW support must align with software subscription duration.

Available Components	Unit List Price (USD)	Product	Original Unit List Price (USD)	Adjusted List Price (USD)	Qty	Extended List Price (USD)	Status
UCS 9500 CHASSIS		UCSX-9508-D-U	39,941.59	39,941.59	2	101,431.86	VALID

(Step 9) :

a. Enter the term duration.

b. Click on **Apply** and **Done**

Service SKU	Product SKU	Unit List Price (USD)	Qty	Total List Price (USD)
SMART NET TOTAL CARE (2 Items)	C4P (SNTC 24X7X4OS) SUMMARY	2,115.00	1	2,115.00
CON-OSP-UCSX95U8	SNTC-24X7X4OS UCS 9508 Chassis Configured SERVICE SKU		1	
CON-OSP-UCSX210C-M7	UCS 210c M7 Compute Node w/o CPU, Memory, Storage, Me...	3,730.50	1	3,730.50

(Step 10) :

- Select **UCSX-210C-M7-U** ATO from under MLB by clicking the **+**
- Notice the **UCSX-210C-M7-U** ATO status is **invalid** as further configuration needed.
- Click on 'Edit Option' to enter the configurator.

The screenshot shows the 'UCSX Modular Server' configuration screen. At the top, it displays the bundle configuration name 'UCSX-M7-MLB' and the estimated lead time of 45 days. Below this, there are three main categories: CPU, Memory, and Drives, each represented by a green button. The 'Available Components' section on the left lists various UCS components with their unit list prices. The 'UCSX-210C-M7-U' component is highlighted with a blue box and labeled 'a'. In the center, there are two tables for 'UCS 9500 CHASSIS' and 'UCSX MODULAR SERVER'. The 'UCSX-9508-D-U' row in the first table is labeled 'b'. The 'UCSX-210C-M7-U' row in the second table is labeled 'c' and has an 'INVALID' status indicator. Arrows point from the labels 'a', 'b', and 'c' to their respective components in the interface.

(Step 11) :

- Configure **UCSX-210C-M7-U** by selecting peripherals from category window on the left.
- PIDs are listed in the window on the right. some PIDs like CPUs, memory and drives are grouped according to type or series; select from the grouped options located above SKU window on the right.
- Follow **warning** messages to configure the minimum required option PIDs.
- Click on **Done** when completed.

The screenshot shows the 'OPTION SELECTION' screen for the 'UCSX-210C-M7-U' component. On the left, a 'Configuration Summary' table shows the selected options: Processor (1), Memory (Front MEZZ - Controller/GPU, Rear MEZZ - MLOM/PCI), Storage Drives (SATA M.2), Security Options (XSeries ComputeNode SW), and UCSX-C-SW-LATEST-D (1). The total price is \$6,376.38 and the estimated lead time is 45 days. The 'Processor' row is highlighted with a blue box and labeled 'a'. On the right, a table titled 'UCSX-210C-M7-U > Processor' lists five processor models: UCSX-CPU-I8452Y, UCSX-CPU-I8454H, UCSX-CPU-I8458P, UCSX-CPU-I8460H, and UCSX-CPU-I8460Y+. The 'UCSX-CPU-I8452Y' row is labeled 'b'. A warning message at the top right states: 'A selection of either UCSX-ML-V5Q50G-D or UCSX-ML-V6B200G-D from Rear MEZZ - MLOM/PCI is required. Please adjust the selections. (CE200096)' and 'UCSX-210C-M7-U requires a minimum of 1 and allows maximum of 2 from Processor. (CF100015)'. The 'Done' button at the bottom right is labeled 'd'. Arrows point from the labels 'a', 'b', and 'd' to their respective components in the interface.

(Step 12) :

- Note Status is now **valid**.
- Increase the quantity for multiples of same configuration.
- Click the **+** to add and configure the same product with different option/quantities or select a different product.

The screenshot shows the UCSX Modular Server configuration interface. At the top, it displays the bundle configuration name "UCSX-M7-MLB" and a maximum estimated lead time of 45 days. Below this, there are sections for "CPU", "Memory", and "Drives". A blue arrow points from the "UCSX-210C-M7-U" section to the "Available Components" table. The table lists two items: "UCSX-210C-M7-U" (6,376.38 USD) and "UCSX-440P-D-U" (3,316.50 USD). The "UCSX-210C-M7-U" row has a quantity of 2, indicated by a blue "2" button labeled "C". The "UCSX-440P-D-U" row also has a "2" button. To the right of the table, there are three tabs: "Key", "Valid", and "INVALID". The "VALID" tab is selected. Blue arrows labeled "a" and "b" point to the "VALID" status indicators for the two rows respectively. The interface also includes sections for "FABRIC INTERCONNECT" and "CISCO INTERSIGHT".

(Step 13) :

- Click on **Edit Service/Subscriptions** to edit term duration for HW support.

Note: It is recommended that term duration for HW support must align with software subscription duration.

The screenshot shows the UCSX Modular Server configuration interface. At the top, it displays the bundle configuration name "UCSX-M7-MLB" and a maximum estimated lead time of 45 days. Below this, there are sections for "Services/Subscriptions" and "CPU", "Memory", and "Drives". A blue arrow points from the "UCSX-210C-M7-U" section to the "Services/Subscriptions" table. The table lists the same two items as the previous screenshot: "UCSX-210C-M7-U" (6,376.38 USD) and "UCSX-440P-D-U" (3,316.50 USD). The "UCSX-210C-M7-U" row has a quantity of 2, indicated by a blue "2" button labeled "a". The "UCSX-440P-D-U" row also has a "2" button. To the right of the table, there are three tabs: "Key", "Valid", and "INVALID". The "VALID" tab is selected. Blue arrows labeled "a" and "b" point to the "VALID" status indicators for the two rows respectively. The interface also includes sections for "FABRIC INTERCONNECT" and "CISCO INTERSIGHT".

(Step 14) :

- Enter the term duration.
- Click on **Apply** and **Done**

(Step 20) :

a. Click on **Edit Service/Subscriptions** to edit term duration for hw support.

Note: It is recommended that term duration for HW support must align with software subscription duration.

The screenshot shows the 'Fabric Interconnect' configuration page. A blue arrow points from the 'Services/Subscriptions' tab at the top right to the 'Services/Subscriptions' section in the center. The 'Services/Subscriptions' section contains three tables for different components:

- UCS 9500 CHASSIS > 2 Selected (Min 0, Max 99999)**: Shows one item: 'UCSX-9508-D-U' with a quantity of 2 and a total price of 101,431.86 USD.
- UCSX MODULAR SERVER > 2 Selected (Min 0, Max 99999)**: Shows one item: 'UCSX-210C-M7-U' with a quantity of 2 and a total price of 41,123.84 USD.
- FABRIC INTERCONNECT > 1 Selected (Min 0, Max 99999)**: Shows one item: 'UCSX-FI-6536-D-U' with a quantity of 2 and a total price of 124,596.48 USD.

Each table has a 'Key' column header and includes links for 'Add Custom Name', 'Edit Options', 'Edit Services/Subscriptions', and 'Remove Line'.

(Step 21) :

a. Enter the term duration.

b. Click on **Apply and Done**.

The screenshot shows the 'Edit Services/Subscriptions' page for 'UCSX-FI-6536-D-U'. A blue arrow points from the 'Services/Subscriptions' tab at the top right to the 'Services/Subscriptions' section in the center. The 'Service Options' section includes a dropdown for 'Choose Service Level from All Service Programs', a search bar, and notes about compatible services. It also features a 'Time Duration' section with a radio button for 'Duration' (selected), a dropdown for 'Duration' set to '36', and options for 'Delay service start to' and 'Co-Term service to'. Buttons for 'Reset' and 'Apply' are present. The main table lists services and their details:

Service SKU	Product SKU	Unit List Price (USD)	Qty	Total List Price (USD)
SMART NET TOTAL CARE (1 ITEM)	C4P (SNTC 24X7X4OS) SUMMARY	7,875.00	1	7,875.00
CON-OSP-UCSXUFI	SNTC-24X7X4OS UCS Fabric Interconnect 6536 SERVICE SKU		1	
Change Service	Remove Service			

At the bottom, there are buttons for 'Remove All Services', 'Remove All Additional Services', 'Configuration Summary' (showing 'All prices shown in USD'), and 'Done' (with a blue arrow pointing to it).

(Step 22) :

- a. **CNDL-DESELECT-D** is meant to select only if Customer has already purchased Cisco Intersight License via EA contract or order is for disti fulfillment.

(Step 23) :

- a. Please select appropriate **Reason Code**.
 b. Note: **OPTOUT-EA-ONLY** is place on Compliance Hold and Customers need to contact mailer alias:ucsm7-intersight_compliancehold_notifications@cisco.com to get the hold released.
 c. Click on **Done**

Buy Method Through Distributor (Eg: Tier 1 & Tier 2 Partners)

NOTE: All deals planned to go through Distribution

- **Scenario 1: Customer Without Enterprise Agreement for Cisco Intersight Software License:**
 - A. Configure Hardware On Line One (Step 1 to Step 25)
 - B. Configure Software On Line Two (Step 26 to Step 30)
- **Scenario 2: Customer With Enterprise Agreement for Cisco Intersight Software License:**
 - A. Configure Hardware On Line One (Step 1 to Step 24)

Scenario 1: Customer Without Enterprise Agreement for Cisco Intersight Software License

Follow the below steps to configure the UCSX M7 Server.

A. Configure Hardware On Line One (Step 1 to Step 25)

(Step 1) :

- a. In CCW search for **UCSX-M7-MLB** PID and click on **Add**
- b. Click on **Select Options** to enter the configurator.

The screenshot shows the Cisco Configuration Workstation (CCW) interface. At the top, there is a search bar with the text 'Search by Sku, Program ID, Description and Product Family' and a dropdown menu set to '1'. To the right of the search bar are buttons for 'Add' (highlighted with a red box), 'Find Products & Solutions', and 'Actions'. Below the search bar, there is a note: 'The product discounts are cascaded to subscription items, however subscription items may only be eligible for lower discounts. To apply the proper discount to subscription items, click on "MORE" and then, "Apply Discount".' There is also a 'Set preferences for this estimate' link. The main area displays a table for the 'UCSX-M7-MLB' product. The table has columns for 'Remove Selected Lines', 'Apply Success Track', 'More', 'Filter By' (set to 'All Items'), and sorting icons. The product details shown are: Category: Hardware, Software and Services, Estimated Lead Time: Not Applicable, Unit List Price (USD): 0.00, Qty: 1, Unit Net Price (USD): 0.00, Discount (%): 0.00, and Extended Net Price (USD): 0.00. Below the table, there is a note: 'UCSX M7 Modular Server and Chassis MLB' followed by a warning icon and the text 'Invalid as of 11-Feb-2023 11:51:37 PST'. At the bottom of the screen, there is a navigation bar with links: 'Select Options' (highlighted with a red box), 'Validate', 'Recommended Content', 'Add Note', 'More Actions', and 'Add Subtotal'.

(Step 2) :

- Select UCSX-9508-D-U ATO from under **UCSX-M7-MLB** by clicking the **+**
- Notice the **UCSX-9508-D-U** ATO status is **invalid** as further configuration is needed.
- Click on **Edit Option** to enter the configurator.

(Step 16) :

a. Configure GPU PCIe node **UCSX-440P-D-U** by selecting riser and GPUs.

b. Click on **Done**

NOTE:

■ Must select UCSX Modular Server: UCSX-210C-M7-U and QTY of UCSX-440P-D-U must be less than or equal to UCSX-210C-M7-U

The screenshot shows the 'OPTION SELECTION' screen for the UCSX-440P-D-U node. At the top, there's a diagram illustrating the node's components: **UCSX-440P-D-U** (blue box), **Riser** (green box), and **GPU** (green box). Below this, the 'Configuration Summary' table includes columns for Category, Qty, and Extended List Price (USD). The 'GPU Options' section lists four GPU models: **UCSX-GPU-T4-16-D**, **UCSX-GPU-A16-D**, **UCSX-GPU-A40-D**, and **UCSX-GPUA100-80-D**. A warning message states: 'UCSX-440P-D-U quantity 1 requires a minimum quantity of 2 from PCIe Riser (CE100012)'. The 'Done' button at the bottom right is highlighted with a blue arrow labeled 'b'.

(Step 17) :

a. Select **UCSX-FI-6536-D-U** ATO from under MLB by clicking the **+**

b. Notice the **UCSX-FI-6536-D-U** ATO status is **invalid** as further configuration needed.

c. Click on 'Edit Option' to enter the configurator.

The screenshot shows the 'Fabric Interconnect' configuration screen. At the top, it displays the bundle configuration name: **UCSX-M7-MLB**. The 'Available Components' table lists several items, including **UCSX-FI-6536-D-U** (Fabric Interconnect 6536 for IMM), **UCSX-FI-64108-D-U** (UCS Fabric Interconnect 64108), and **UCSX-FI-6454-D-U** (UCS Fabric Interconnect 6454). The **UCSX-FI-6536-D-U** row has a blue plus sign icon labeled 'a' next to it. In the center, a modal window titled 'Software Image' is open, showing the selected item: **UCSX-FI-6536-D-U**. To the right of the modal, a table for **Power Supply** is shown with one row. At the bottom of the screen, a table for **FABRIC INTERCONNECT** shows one selected item: **UCSX-FI-6536-D-U**. This row has a red 'INVALID' status indicator labeled 'b' and a red arrow pointing to the word 'INVALID'. Another blue plus sign icon labeled 'c' is located next to the **CISCO INTERSIGHT** component in the main list.

(Step 18) :

- Configure **UCSX-FI-6536-D-U** by selecting peripherals from category window on the left.
- PIDs are listed in the window on the right. some PIDs like software image, software license, power supply, power cable options located above SKU window on the right.
- Follow **warning** messages to configure the minimum required option PIDs.
- Click on **Done** when completed

The screenshot shows the configuration interface for the UCSX-FI-6536-D-U. At the top, it displays the fabric interconnect and the selected option: UCSX-FI-6536-D-U part of UCSX-M7-MLB. On the left, there's a 'Configuration Summary' table with columns for Category, Qty, and Extended List Price (USD). The 'Power Cable' row has a quantity of 2 and a total price of 1,987.48 USD. A blue arrow labeled 'a' points to the 'Power Cable' row. To the right, under 'Software Image', 'Software License', and 'Power Supply', there are warning messages. A blue arrow labeled 'b' points to the 'Power Cable' section of the configuration summary. Another blue arrow labeled 'c' points to the 'Power Supply' section of the summary. A blue arrow labeled 'd' points to the 'Done' button at the bottom right of the configuration summary table.

(Step 19) :

- Note Status is now **valid**.
- Increase the quantity for multiples of same configuration.
- Click the **+** to add and configure the same product with different option/quantities or select a different product

The screenshot shows the bundle configuration interface for UCSX-M7-MLB. It includes sections for 'Software Image', 'Software License', and 'Power Supply'. The main area lists available components with their unit list prices and estimated lead times. Blue arrows labeled 'a', 'b', and 'c' point to the 'Power Supply' section of the configuration summary, the 'Power Supply' section of the bundle configuration, and the 'FABRIC INTERCONNECT' section of the bundle configuration respectively. The 'Power Supply' section in the bundle configuration shows a table with columns: Product, Original Unit List Price (USD), Adjusted List Price (USD), Qty, Extended List Price (USD), and Status. The status for all entries is 'VALID'.

(Step 20) :

- a. Click on **Edit Service/Subscriptions** to edit term duration for hw support.

Note: It is recommended that term duration for HW support must align with software subscription duration.

Scenario 2: Customer With Enterprise Agreement for Cisco Intersight Software License

Follow the below steps to configure the UCSX M7 Server.

A. Configure Hardware On Line One (Step 1 to Step 24)

(Step 1) :

- a. In CCW search for **UCSX-M7-MLB** PID and click on 
- b. Click on **Select Options** to enter the configurator.

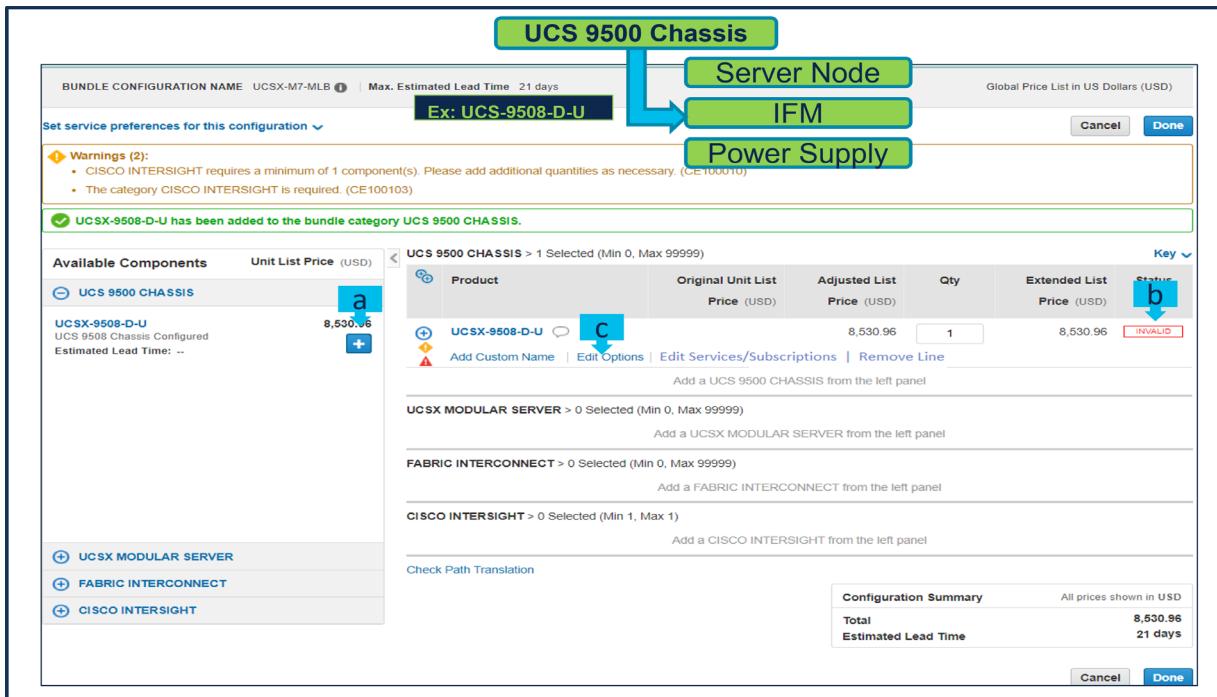

The screenshot shows the Cisco Configuration Workstation (CCW) interface. At the top, a blue arrow points from the text "CCW" to the product name "UCSX-M7-MLB". Below this, there's a search bar and an "Add" button. A note says: "The product discounts are cascaded to subscription items, however subscription items may only be eligible for lower discounts. To apply the proper discount to subscription items, click on "MORE" and then, "Apply Discount".". The main table lists the product details:

	Hardware, Software and Services	Estimated Lead Time	Unit List Price (USD)	Qty	Unit Net Price (USD)	Discount (%)	Extended Net Price (USD)
<input type="checkbox"/>	1.0 UCSX-M7-MLB more 	Not Applicable	0.00	1	0.00	0.00	0.00

At the bottom of the table, there are buttons for "Select Options", "Validate", "Recommended Content", "Add Note", and "More Actions". A red box highlights the "Select Options" button.

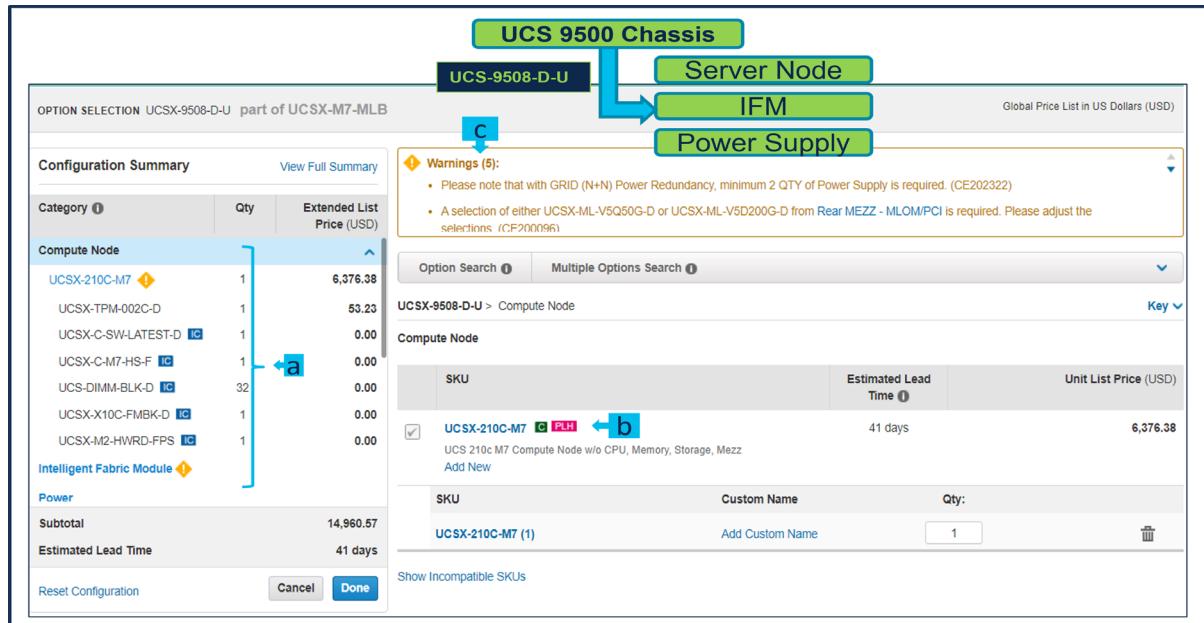

(Step 2) :

- Select UCSX-9508-D-U ATO from under **UCSX-M7-MLB** by clicking the **+**
- Notice the **UCSX-9508-D-U** ATO status is **invalid** as further configuration is needed.
- Click on **Edit Option** to enter the configurator.

(Step 3) :

- Configure **UCSX-9508-D-U** by selecting compute node and intelligent fabric module, power supply and power cables from category window on the left.
- UCSX-210C-M7** is required selection and has further configurable.
- Follow **warning** messages to configure the minimum required selections under chassis

(Step 4) :

- Configure **UCSX-210C-M7** by selecting processor, memory, drives and other peripheral devices and PIDs are listed in the window on the right.
- Follow **warning** messages to configure the minimum required selections under the server
- Click on **Done** when completed.

(Step 10) :

- Select **UCSX-210C-M7-U** ATO from under MLB by clicking the **+**
- Notice the **UCSX-210C-M7-U** ATO status is **invalid** as further configuration needed.
- Click on 'Edit Option' to enter the configurator.

The screenshot shows the UCSX Modular Server configuration interface. At the top, it displays the bundle configuration name as 'UCSX-M7-MLB' and the maximum estimated lead time as 45 days. Below this, there's a section for service preferences and a warning message about minimum component requirements. The main area shows available components on the left and their details. On the right, there are three tables for 'CPU', 'Memory', and 'Drives'. The 'CPU' table contains one item, 'UCSX-210C-M7-U', which is highlighted with a red border and labeled 'a'. The 'Memory' and 'Drives' tables are currently empty. At the bottom, there are sections for 'FABRIC INTERCONNECT' and 'CISCO INTERSIGHT' with their respective add buttons.

(Step 11) :

- Configure **UCSX-210C-M7-U** by selecting peripherals from category window on the left.
- PIDs are listed in the window on the right. some PIDs like CPUs, memory and drives are grouped according to type or series; select from the grouped options located above SKU window on the right.
- Follow **warning** messages to configure the minimum required option PIDs.
- Click on **Done** when completed.

The screenshot shows the 'OPTION SELECTION' screen for the 'UCSX-210C-M7-U' component. It includes a 'Configuration Summary' table and a 'Processor' configuration window. The 'Processor' window has a 'Category' column with options like 'Processor', 'Memory', 'Front MEZZ - Controller/GPU', 'Rear MEZZ - MLOM/PCI', 'Storage Drives', 'SATA M.2', 'Security Options', and 'XSeries ComputeNode SW'. The 'Processor' row is selected and highlighted with a blue bracket 'a'. The 'SKU' table on the right lists five processor models: 'UCSX-CPU-I8452Y PLH', 'UCSX-CPU-I8454H PLH', 'UCSX-CPU-I8458P PLH', 'UCSX-CPU-I8460H PLH', and 'UCSX-CPU-I8460Y+ PLH'. Each row includes a quantity input field, estimated lead time, and unit list price. A warning message at the top right states that a selection of either 'UCSX-ML-V5Q50G-D' or 'UCSX-ML-V5Q50G-D' from 'Rear MEZZ - MLOM/PCI' is required. The 'Processor' row also has a warning message: 'UCSX-210C-M7-U requires a minimum of 1 and allows maximum of 2 from Processor' (CF100015). Buttons for 'Cancel' and 'Done' are at the bottom.

(Step 12) :

- Note Status is now **valid**.
- Increase the quantity for multiples of same configuration.
- Click on the **+** to add and configure the same product with different option/quantities or select a different product.

GPU

PCIe Riser

Cancel **Done**

a

b

(Step 16) :

a. Configure GPU PCIe node **UCSX-440P-D-U** by selecting riser and GPUs.

b. Click on **Done**

NOTE:

■ Must select UCSX Modular Server: UCSX-210C-M7-U and QTY of UCSX-440P-D-U must be less than or equal to UCSX-210C-M7-U

The screenshot shows the 'UCSX Modular Server' configuration interface. At the top, a callout points from the 'Riser' and 'GPU' components to the 'UCSX-440P-D-U' node in the 'OPTION SELECTION' section. The 'Configuration Summary' table includes columns for Category, Qty, and Extended List Price (USD). The 'GPU Options' section lists four GPU models: UCSX-GPU-T4-16-D, UCSX-GPU-A16-D, UCSX-GPU-A40-D, and UCSX-GPUA100-80-D. A warning message states: 'UCSX-440P-D-U quantity 1 requires a minimum quantity of 2 from PCIe Riser (CE100012)'. The 'Done' button at the bottom right is highlighted with a blue arrow labeled 'b'.

(Step 17) :

a. Select **UCSX-FI-6536-D-U** ATO from under MLB by clicking the **+**

b. Notice the **UCSX-FI-6536-D-U** ATO status is **invalid** as further configuration needed.

c. Click on 'Edit Option' to enter the configurator.

The screenshot shows the 'Fabric Interconnect' configuration interface. A callout points from the 'Software Image', 'Software License', and 'Power Supply' components to the 'Ex:' section, which lists three components: UCSX-FI-6536-D-U, UCSX-FI-64108-D-U, and UCSX-FI-6454-D-U. A warning message states: 'CISCO INTERSIGHT requires a minimum of 1 component(s)' and 'The category CISCO INTERSIGHT is required. (CE100103)'. The 'Available Components' table includes entries for UCS 9500 CHASSIS, UCS MODULAR SERVER, FABRIC INTERCONNECT, and CISCO INTERSIGHT. The 'FABRIC INTERCONNECT' section shows three entries: UCSX-FI-6536-D-U, UCSX-FI-64108-D-U, and UCSX-FI-6454-D-U. The 'UCSX-FI-6536-D-U' entry has a blue arrow labeled 'a' pointing to the '+' icon. The 'Status' column for this entry shows 'INVALID' with a red arrow labeled 'b'. A callout labeled 'c' points to the 'Edit Options' link for the same entry.

(Step 18) :

- Configure **UCSX-FI-6536-D-U** by selecting peripherals from category window on the left.
- PIDs are listed in the window on the right. some PIDs like software image, software license, power supply, power cable options located above SKU window on the right.
- Follow **warning** messages to configure the minimum required option PIDs.
- Click on **Done** when completed

The screenshot shows the configuration interface for the UCSX-FI-6536-D-U. At the top, it displays the fabric interconnect name and a summary of selected options: Software Image, Software License, and Power Supply. A warning message indicates that the UCS-PSU-6536-AC-D is defaulted under Power Supply (CE100033) and N10-MGT018-D is defaulted under Software Image (CE100033). The configuration summary table includes rows for Software Image, Software License, Power Supply, and Power Cable. The Power Cable row has a quantity of 2 and a total price of 1,987.48. The Power Cable category is highlighted with a blue arrow labeled 'a'. The Power Cable list on the right shows five options: NO-POWER-CORD, CAB-C13-C14-3M-IN, CAB-C13-C14-2M, CAB-C13-C14-AC, and CAB-C13-C14-IN. The CAB-C13-C14-AC option is selected. The Done button at the bottom right is highlighted with a blue arrow labeled 'd'.

(Step 19) :

- Note Status is now **Valid**.
- Increase the quantity for multiples of same configuration.
- Click the **+** to add and configure the same product with different option/quantities or select a different product

The screenshot shows the bundle configuration interface for the UCSX-M7-MLB. It lists available components: UCS 9500 CHASSIS, UCSX MODULAR SERVER, FABRIC INTERCONNECT, and CISCO INTERSIGHT. The FABRIC INTERCONNECT section is expanded, showing three options: UCSX-FI-6536-D-U, UCSX-FI-64108-D-U, and UCSX-FI-6454-D-U. The UCSX-FI-6536-D-U row has a quantity of 2 and a total price of 101,431.86. The status is marked as VALID. The UCSX MODULAR SERVER section shows two selected items: UCSX-9508-D-U and UCSX-210C-M7-U, each with a quantity of 2 and a total price of 41,123.84. The status is also VALID. The CISCO INTERSIGHT section shows one selected item: UCSX-FI-6536-D-U, with a quantity of 2 and a total price of 124,596.48. The status is VALID. Blue arrows labeled 'a', 'b', and 'c' point to the Done button, the UCSX-FI-6536-D-U row, and the UCSX MODULAR SERVER section respectively.

(Step 20) :

- a. Click on **Edit Service/Subscriptions** to edit term duration for hw support.

Note: It is recommended that term duration for HW support must align with software subscription duration.

CHAPTER 4 PREREQUISITE INFORMATION REQUIRED TO QUOTE AND ORDER

NOTE: Before Ordering, Please collect all mandatory customer information.

Table 4 Table below lists required customer details before placing order

	Customer specific detail for placing Cisco Intersight Software License purchase order	Why?
1	End customer's "Cisco Smart Account" & "Virtual account" name	Cisco Intersight Software licenses are deposited into customer Smart Account + Virtual account
2	"Shipping & Install" - End customer's email-id	Allows End Customer (user) to access Cisco's eDelivery, licenses, legal documents and self provision for Cisco Intersight Software License
3	"Billing contact" - for Cisco Intersight Software License subscription billing	Subscription billing for the duration of subscription
4	CCO user id for at least one End Customer - users expected to use Cisco Intersight Software License portal.	CCO user id + Cisco Smart Account is used to provision access to Cisco Intersight Software License features
